## **DETAILED ACTION**

### ***Remarks***

This Office action is responsive to applicant's amendment filed March 31, 2006.

Claims 1-3, 12, 16 and 17 are pending.

### ***Claim Rejections - 35 USC § 103***

The rejection of claims 1-4, 12 and 14-17 under 35 U.S.C. 103(a) based on Yoshimura et al. (U.S. Pat. 5,578,395) and Ebel et al. (U.S. Pat. 5,114,811) has been obviated.

By the present amendment, the recitation of the positive electrode consisting essentially of manganese dioxide, *inter alia*, precludes a prior art teaching of such an electrode having a composite manganese dioxide/lithium manganese dioxide active material, such as taught by Yoshimura et al.

### ***Allowable Subject Matter***

Claims 1-3, 12, 16 and 17 are allowed. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record does not teach or suggest a lithium primary battery wherein the positive electrode consists essentially of manganese dioxide, boron and carbon. The examiner notes that the reasons for allowance of the instant claims are the same as the provisional reasons for allowability of claim 13 (now canceled), as set forth in the prior Office action.

Art Unit: 1745

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Pat. 6,461,770 B1 to Yoshimura et al. is cited to teach a secondary lithium battery containing boron.
